Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Albero et al. (US 6,704,625) in view of Holmes (US 3,060,684).

Albero et al. discloses an aircraft comprising: a fuselage having a passenger cabin; a jet engine configured to provide propulsive thrust to the aircraft; an electric generator operably coupled to the jet engine and configured to receive shaft power from the jet engine; and an environmental control system including at least one compressor motor configured to receive electric power from the electric generator to provide outside air to the passenger cabin in the absence of bleed air from the jet engine (see lines 32-67 of col. 2, lines 1-18 of col. 3); and a fuel tank.

Albero et al. lacks a variable speed fuel pump.

Holmes teaches that it is old and well known to provide a variable speed means to drive the fuel pump in an aircraft. It would have obvious to one having ordinary skill in the art at the time the invention was made to have modified the fuel pump of Albero et al. so that the fuel pump has a variable speed means, in a similar manner as taught in Holmes, since to do so would allow the fuel to be transferred from the tank to the engine at variable speeds depended on the need for fuel.

Allowable Subject Matter

3. Claims 2-9,11,13-17,24-26, and 37-39 are allowed.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
